

SNAP-8

Category: Cosmetic

Description

SNAP-8 is an octapeptide and extended version of Argireline. By elongating the chain, it more effectively blocks the SNARE complex, resulting in greater reduction of expression lines.

Protocol & Dosage

Recommended dosage: 3-5% in topical formulations

Biological half-life: N/A (topical)

Administration: Subcutaneous injection (typical)

Key Benefits & Mechanisms

- ✓ Greater wrinkle reduction than Argireline

- ✓ Expression line smoothing

- ✓ SNARE complex inhibition

- ✓ Skin softening

- ✓ Anti-aging

Side Effects & Safety Profile

- ✓ Possible mild irritation

- ✓ Rare unusual facial expression patterns
